CREEL SURVEY

STUDY 9.0 CREEL SURVEY

Based on agency input provided during the May 11, 2009, Recreation, Land Use, and Aesthetics Study Plan Meeting, it was determined that Study 8.0, Recreation User Survey, and Study 9.0, Creel Survey, in the District's Proposed Study Plan could be combined into a single study that would allow increased survey efficiency. The combined study plan is presented as Study 8.0, Recreation Use, in this Revised Study Plan. Study 8.0, Recreation Use, defines how two separate and tailored surveys will be used to obtain general recreation user information and information specific to anglers that use Project waters.
